Do you take pride in your safety management experience and want to continue to share your knowledge with others?

"I have worked on many industrial construction projects, and I get a lot of satisfaction making sure everyone goes home safely to their families every night. That's exactly what I get to do as a Site Safety Professional with APG."
Ken J.

If this sounds like you, read on!

Requirements:

- 3 - 5 years construction safety management experience.
- Degree in safety management and/or BCSP designations preferred.
- The ideal candidate would have experience with construction and chemical manufacturing.
- Ability to lead and influence others both upstream and downstream.
- Ability to interpret and communicate client policies and core values to others.
- Proficient in Microsoft Office (Word, Excel, Outlook).
- Positive professional attitude, and strong customer service skills.

Activities/ Responsibilities/ Duties:

Perform as an advocate for client by promoting company culture, policies and procedures and promoting a positive attitude towards the advancement of Company Principles, Mission, and Vision. Represents client in a professional manner with both internal and external customers.

- Address various process hazards when decommissioning manufacturing equipment.
- Implement and manage project construction safety programs.
- Identify training needs, participate in safety orientations and training programs.
- Tracking and analysis of all safety, injury and hazard statistics and trend analysis
- Conduct work area safety audits, inspections.
- Conduct, assist and lead major incident analysis.
- Monitor and review subcontractor activities for safety concerns.
- Champion safety achievement and performance improvement throughout the project.
- Ensure adherence to the site-specific safety plan, including emergency action, response, evacuation, and security plans.
- Verify all project personnel have the requisite safety training and PPE pertinent to their scope of work.
- Ensure adequate safety management coverage on the assigned projects at all times.
- Constantly solve problems and resolve issues through face to face and personal communication with all stakeholders.

Education/ Experience:

- Associate degree in construction safety management.
- 5 years of construction safety management experience.
- Experience in investigating, documenting, and developing corrective actions for accidents and incidents.
- External/Internal proven safety auditing experience and knowledge of OSHA standards.

Certificates / Licenses:

- BCSP or other equivalent Safety Certifications preferred.
- CHST certification or equivalent.
- OSHA 510.
- First Aid/CPR/AED.
- NFPA 70E.

Duration:

- Planned start date: ASAP
- Planned end date: 12/31/24.

Compensation and Benefits:

- Pay Rate: \$50-\$60/hour depending upon previous experience and qualifications. A typical work week is 40 hours per week. Overtime is not expected. Local candidates strongly preferred.
- Benefits: 401(k), 401(k) matching, Health insurance, Health Savings Account (HSA), Dental insurance, Life insurance, Vision insurance, Paid Time Off (PTO), vacation, and holidays.
