9/2022

Dear Hiring Manager,

My name is Anne Bormann and I have recently finished my nursing degree (ASN) at Normandale College in 12/2021. I was also a former nursing student at the University of Wisconsin- Oshkosh College of Nursing. Please consider me for any open RN position. With previous Clinical and Laboratory experience throughout my education, I enclose my resume as a first step in exploring the possibilities of employment with your agency.

My background in helping others makes me an excellent candidate. I have experience working with people of diverse ages and abilities. During clinical, I assisted patients, updated charting in EPIC, and coordinated and communicated with unit staff. I have administered medications, assured patient safety at all times, and completed assessments. I have assisted parents in a nanny role and have ensured the safety and well-being of clients as a Home Health Aide. I am passionate about helping others successfully transition into the next season of their lives. I also have experience as a house manager in the past. I did this in a women's maternity homeless shelter (Philomena House) as well as at a transitional home for women (Good Samaritan House). In both of these settings, I also encountered and effectively cared for those with mental illness and a history of abuse.

I have completed my RN program and am on the MN Registry. I have completed clinical rotations on Medical/Surgical units as well as Coronary Specialty Care units. I have experience with taking vitals, administering injections, and completing assessments. I have always demonstrated empathetic and compassionate care to the patients I have served. I am working toward my BSN at Minnesota State University- Mankato. I would also like to find a part-time RN position that I can do while I am pursuing in my education as a BSN-RN online.

Thank you for your time and consideration. I look forward to speaking with you about the opportunity to help in a way that allows me to use my Nursing education to love, serve, and help improve one's health in body, mind, and soul.

Sincerely,

Anne Bormann
